

Whiteley Dental Diamonds

Laura Kearley, oral health educator and nurse at the practice is a founder member of the Fareham DragonFlys netball team. The team was formed 2 years ago as part of the initiative 'return to netball' to encourage more women to play netball.

In their time together the girls have been promoted from division 7 to division 3. To celebrate this achievement they wanted to acquire a **prestigious sponsorship deal** and so approached the practice. After some tough negotiation we agreed to provide the girls with a new kit for the forthcoming season and they agreed to change their name accordingly.

Missing teeth? We can help!

Dental implants are a great way of replacing one or more missing teeth. They are strong, permanent, and look and feel completely natural.

The implants themselves are tiny titanium metal posts which are gently placed into your jawbone. Over a few months, your jawbone bonds with the posts, forming in effect a false tooth root.

The implants then provide a stable base for either a single missing tooth or a bridge replacing a number of teeth. They can also hold dentures firmly in place, making eating and speaking much easier.

Here at Whiteley Dental Practice we have the skills and experience to fit most dental implants, however, in complex cases rest assured that an appropriate referral to a specialist implantologist will be made.

Please ask us if you would like to know more.

A whiter, brighter smile

Facial aesthetics

We realise that as well as wanting your smile to look great, you'd also like the rest of your face to look equally good. Facial aesthetics treatments help to remove or reduce lines, and improve facial contours. As dentists we are ideally placed to carry them out because of our advanced knowledge of the structure of facial tissue, and our experience in carrying out intricate procedures.

For lines caused by muscle movements, such as frown lines, creases on the forehead and crows' feet around the eyes, we use an approved wrinkle treatment. This causes the treated muscles to relax, softening and smoothing the wrinkles.

Our dermal fillers are made from a natural material which binds with the water within your skin to lift it and make it firmer. The treatment can be used to make your lips look fuller and less lined around the edges, and can also improve your facial contours and smooth facial lines.

Please telephone or call in to see us if you would like more information.
